

IBIS & IBIS plus

**Individual Update Service
for standards and regulations**

The update of your standards means a lot of work. With our Individual Update Service you save this time and money!

IBIS & IBIS plus

Individual Bibliographic Information Service

Keeping document collections (standards and regulations) up to date – especially important when your company is certified according to ISO 9001 – means a lot of work: researching in catalogues, databases and the internet, but also purchasing the current documents. This work costs a lot of time and money.

With the update service IBIS and IBIS plus of Austrian Standards plus you can save this time completely and reduce your costs to a minimum.

Our experts check your standards and regulations (national as well as international ones) and provide you a list of all your standards which are not up-to-date*. According to your wish this happens 4 times a year and can also include the purchase of the updated standards.

If you purchase further standards or regulations at Austrian Standards plus, they will automatically be included in the service. Twice a year you receive an overview of all your standards included in the service, which you can change and adjust according to your needs.

The different models of IBIS

Model 1 – One-Time Update

Includes a check of your current standard asset and a list of bibliographic data concerning updated standards and adjustments. This service can be carried out at any time and will be done as quickly as possible.

Model 2 – IBIS

Your standards are checked quarterly (March, June, September, December) and you receive an overview of the updated standards including the document number, title, part, date of issue and the kind of change („pulled-back“, „replaced by ...“ etc.).

Model 3 – IBIS plus

Additionally to the bibliographic information of updated standards and changes as with IBIS, with IBIS plus you automatically receive all updated full-text documents. The delivery of the documents is depending on your choice in paper, on CD-ROM or per e-mail (PDF).

Generally:

You tell us which standards or regulations you want us to be checked for updates and we state an offer as soon as we made sure of the feasibility.

* Possibly you own documents where it is not possible for us to guarantee an update. In these cases we will inform you about other solutions.
